THE AUTOMOTIVE

THE AUTOMOTIVE . One of the most incredible human invention!

It is the driving force for a society in perpetual search for innovation. A mean of unification in this ever-changing world. The automotive is, above all, a **passion**. In motorsport, it forces you to push back your limits. It is able to turn millions of people into a group of **enthusiasts**. It brings out incredible emotions when we admire its design, advanced technology and speed.

The automotive is the smile of a child playing with his little toy car, imagining to be adult. Some collect them, others admire them, some dream of them: this is the **spirit of the CASTLES RALLY**, where the automotive is first of all, a notion of sharing.

The automobile is not only an object of desire, it is the link between us, petrol-head. It brings us closer, it creates encounters between people from different horizons. Each car lover brings his own knowledge, and communicates to the others through his passion. This is also the spirit of the CASTLES RALLY.
